MARKETING SECTION MANAGER · SECOND-ROUND ASSESSMENT

Strengthening Alfanar Projects' brand awareness

A six-month plan connecting brand leadership, commercial priorities and AI execution.

Mohamed Elhellawy

18 October 2026 · 20 minutes

Alfanar already has a strong story.

The projects, people and experience are already here. My plan is to make their impact more visible to the people who matter to the business.

Brand leadership

Make the existing positioning clear, consistent and relevant.

Commercial focus

Connect the story with priority buyers and stakeholders.

AI execution

Help the team research, create and improve the work.

Source: alfanarprojects.com · About Us

What I found when I looked at Alfanar

A STRONG FOUNDATION

- Published projects, engineering experience and named clients
- A LinkedIn audience above 800,000 (October 2026)
- Saudi roots with international project experience
- Search visibility for the company name and individual projects

THE NEXT OPPORTUNITY

- Help new buyers find Alfanar through its services
- Make the website easier to find, read and share
- Show more of the experts and people behind the projects
- Connect communication with business-development conversations

How I researched this: website crawl, Semrush estimates, mobile-speed readings and AI-answer tests (15–16 Oct 2026), plus public website and social content. In Month 1, Alfanar's analytics and BD feedback complete the picture.

We're visible. Are we reaching the right people?

~45%

of visits go to careers pages

Two job pages take about 45 of every 100 estimated Google visits.

0 of top 100

search terms are buyer searches

No "substation contractor" or "solar EPC KSA" among the terms bringing the most traffic.

31 /100

AI visibility score

Semrush's score for Alfanar's presence in AI answers.

AI SEARCH TEST · "TOP EPC CONTRACTORS IN SAUDI ARABIA"

ChatGPT

Named Alfanar first, but linked to the Group website

Gemini

Named Alfanar second, after L&T

Perplexity

Named Alfanar fourth for substations

The opportunity: attract more searches for Alfanar's services, and connect AI recognition to the Projects website.

Some opportunities are quick to fix

FIRST 10 DAYS

279 pages

Search & share text

No page had a meta description; social previews read “undefined”. Fix the templates.

FIRST 15 DAYS

404

Clear paths for engines

Standard crawl files missing; no canonical or language tags. Correct the signals.

FIRST 30 DAYS

5.3 s

Faster mobile loading

Main content loads in 5.3 s (good is 2.5 s); homepage weighs ~40 MB. Compress media.

FIRST 30 DAYS

1 name

Alfanar Projects, clearly

Some AI answers use the Group site or “Alfanar Construction”. Align facts and profiles.

شركات مقاولات كهرباء في السعودية

“Electrical contracting companies in Saudi Arabia” · about 1,600 searches a month, low difficulty (12). A focused Arabic service page can win it.

Who do we need to reach, and why?

Potential customers

Utilities, energy companies, developers, government-owned businesses, project owners

e.g. Saudi Electricity Company, National Grid SA

Show why Alfanar is relevant and open a qualified discussion.

People who influence decisions

Engineering consultants, technical experts, procurement advisers, industry media

Need clear technical evidence and expert views

Build confidence in Alfanar's expertise.

Institutions & partners

Government bodies, associations, chambers, universities, research

e.g. Saudi Council of Engineers, Saudi Contractors Authority

Strengthen relationships and industry recognition.

Saudi Arabia first Initial focus: **Grid + Renewable Energy**, with all six business lines kept visible under one master brand.

Our work. Our people. Our impact.

Our work

Project achievements, engineering expertise, innovation and quality.

Our people

Engineers, development, teamwork, safety and local skills.

Our impact

Social responsibility, local suppliers, community benefit, sustainability.

Pair each project story with the people behind it, and share CSR results people understand: skills developed, participation, community feedback.

Four things I would focus on

PRIORITY	OWNER	BENEFIT	MEASURE
Understand the right audiences	Marketing + BD	More relevant activity	Account engagement
Make Alfanar easier to discover	Digital + IT	Useful service discovery	Qualified search visits
Tell the complete company story	Content + engineering + HR/CSR	Capability and human connection	Relevant story engagement
Connect communication with relationships	Marketing + BD	Stronger stakeholder contact	Accepted meetings

Shared foundation: AI operations & measurement — Twelve automation ideas, starting with a project-to-content pilot. AI drafts and reports; engineering and marketing approve.

One story. Different channels. Different audiences.

One verified project or people story

Approved facts, scope, permissions and audience

Website

Full case study · search + AI

LinkedIn

Engineer + executive voice

Video

Interview + subtitles

Industry media

Technical credibility

Events

Expert briefing

Business development

Account material

Relevant awareness · trust · stakeholder engagement

What my social review showed: LinkedIn already covers projects, news and milestones well. There is room for more engineer perspectives, technical explanations and people stories.

How AI would help us work better

BEFORE · PROJECT FACTS

Alfanar Projects played a role in delivering a battery energy storage system in Bisha. The facility provides 2,000 MWh of storage using 488 units and can deliver up to 500 MW over four hours.

→

AFTER · AI-ASSISTED, HUMAN-APPROVED

How Bisha BESS strengthens the case for grid-scale storage

As power systems add more renewable generation, storing energy for when demand rises becomes increasingly important. In Bisha, Alfanar Projects contributed to the delivery of a 2,000 MWh battery energy storage system for Saudi Electricity Company. With 488 units and up to 500 MW over four hours, it shows the scale at which storage can support grid flexibility and renewable integration.

Website / search	Social	Video	Content	Internal ops	Events
Buyer questions	Audience variants	Scripts + subtitles	Research + drafts	Workflows + reporting	Briefs + follow-up

Engineering the Future, Project by Project

Bisha BESS

2,000 MWh system · delivery contribution for SEC

Utilities + grid planners · technical briefing, LinkedIn

Jazan Entertainment Complex

73,000 m² built-up · EPC scope for SEVEN

Developers + institutions · industry PR, account material

Industrial City rooftop solar

4 MW installed · captive rooftop solar, Riyadh

Industrial energy buyers · case study, outreach

A five-week pilot in Months 2–3, with an engineer or team perspective in each story, then improved distribution through Month 6.

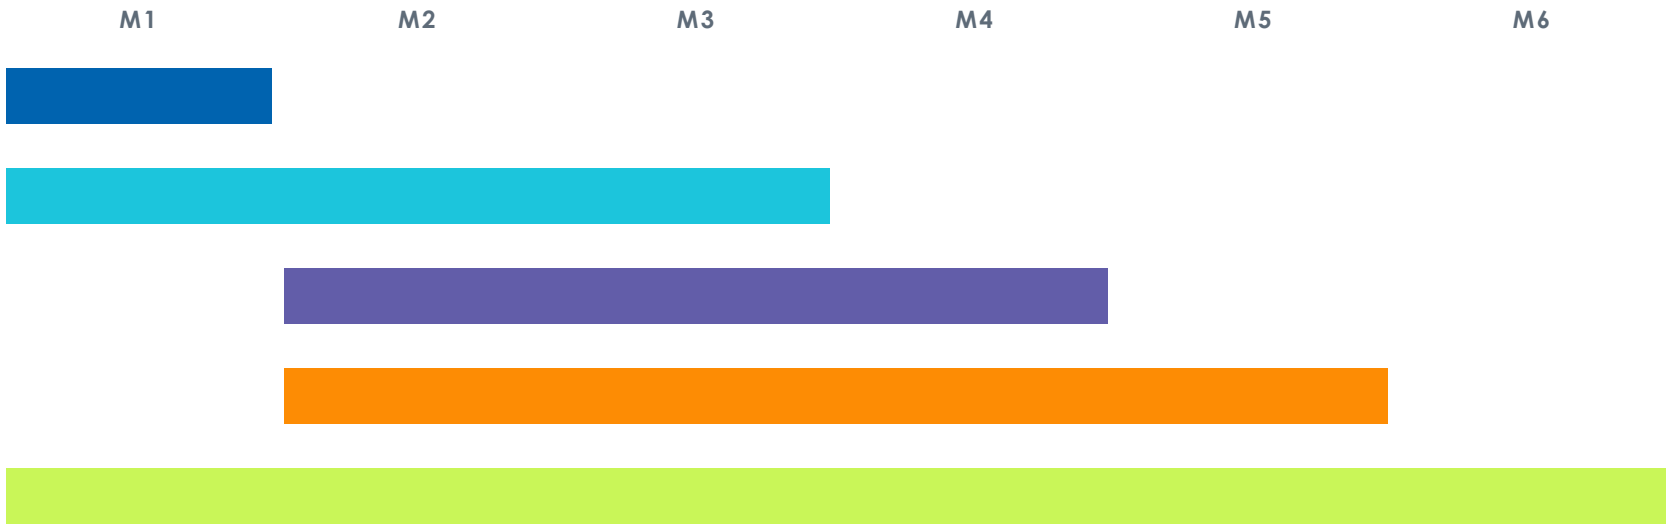

How will we know it's working?

WHAT SHOULD CHANGE	STARTING POINT	TARGET / REVIEW
Website quality	279 pages without descriptions · 5.3 s mobile load	Zero missing · main content within 2.5 s
Relevant discovery	0 buyer searches in top 100 · AI score 31/100	More service visibility and qualified visits
Recognition & trust	What target audiences know about Alfanar	Compare recognition in Month 1 and Month 6
Engagement & contribution	Today's inquiries, meetings, opportunity sources	Qualified meetings, CSR results, BD progression

$$\text{ROI} = \frac{\text{attributable gross profit} - \text{marketing cost}}{\text{marketing cost}}$$

Marketing-sourced and marketing-influenced pipeline are reported separately, because EPC contracts have long cycles and many stakeholders. The AI pilot also tracks production time, review effort and factual corrections.

My first 90 days and the following six months

Day 30
Accounts, baseline, access, priority fixes

Day 90
Five-week pilot done, routing tested

Month 6
Scale, revise or stop

RESOURCES

Marketing manager, shared content/design, digital/web, BD, engineering and HR reviewers.

RISKS

Approvals, asset permissions, data access. Managed with named reviewers, staged budgets and monthly reviews.

For the world.
With the world.™

Make the projects, people and impact more visible to the right audiences.

MY STARTING REQUEST

A 90-day pilot, agreed priorities and named owners.

Mohamed Elhellawy · Thank you
